

WP3 – Analysis of the results

WP leader: partner 2, BME – Budapest University of Technology and Economics

The objective of the workpackage is to analyse the data collected in WP2 and prepare a report on the results of the survey, synthesising the university reports and drawing general conclusions. The report will present the results of the survey and compare the findings at the universities taking part and also other international data.

A **synthesis report** will be prepared integrating the most important findings of the university reports and comparing the results, both based on the comparison between universities and on the comparison between the two fields of science involved. Conclusions will be drawn and recommendations will be formulated with respect to possible actions to carry out at universities in order to implement gender mainstreaming. Further issues to study will also be identified.
